Partnership for transnational Education for sustainable development and Degrowth education

Learning Teaching and Training Activity for educators in 2 parts

Online:
Sept. 9-10, via Zoom
Thursday: 17:00-20:00
Friday: 09:30-12:30 and 14:30-17:30

In Person:
Sept. 30-Oct. 3, 2021 in Prague

The LTTA is designed as a training and networking event for educators, trainers and teachers in the fields of education for a socio-ecological transformation and Degrowth. We try to explore the most suitable ways to engage young people in different contexts in practical activities towards a just future for all. The event will also be a first step/kick-off for the collective process of developing a Czech-language methodological handbook.

In the online part, inputs from experts on specific dimensions of the topic will deepen our understanding and sharing amongst us will allow to collect relevant materials and resources.

During the in person meeting, we will dive deeper and draw upon everyone’s practical experiences: Trying out methods, reflecting upon them and developing them, e.g. by improving their suitability for the different contexts we are working in.

What to expect:

- Include a broad range of experiences to create a practical tool.
- In a joint process, we want to explore what is already there and what is missing/what else would help you for your educational practice.
- Practically trying out a number of methods, reflect upon them and develop them further. Create a pool of methods from non-formal education
- full of empowerment and sharing that with each other
